

WEATHERING CERTIFICATE

ORIGINAL

Sawdust charcoal and white charcoal made from sawdust and wood. Our manufacturing process are below:

- 1) We collect timber (sawdust and wood) from farmer. After cutting and selection we sent raw material to kiln. Carbonization process are required six or seven days, after sawdust and wood are changed to carbon we close door of kiln. It's cooling process, then after four days after we open kiln and take charcoal out.
- 2) Charcoal selection process: Hard charcoal and good quality will be picked and sent to warehouse for cutting machine and selection staff. It's take four or five days of selection, charcoal will be sent to packing process.
- 3) Packing process: L/M/S size will be separate for 3 grade, and it's packed nylon bag. After check weight of charcoal we sent to carton packing process. This step must be two or three days so charcoal.
- 4) Sawdust charcoal and white charcoal sent to warehouse to waiting customer checker come to test quantity and check packing, check weighting.
- 5) Last process: after receipt confirmation from customer charcoal will be loaded into container. Processing needed at least 25-30 days after cooling process finished.

We undersigned, herewith certify that after packaging process cargo has been stored 28 days for pre-cooling prior stuffing.
